This information is valid as of July 2007

* For information about composting workshops, contact Calypso Farm and Ecology Center on the web at www.calypsofarm.org.

** There is currently no comprehensive plastic or glass recycling available in Fairbanks.

*** Reuseables are items still in good enough condition to be used. In addition to the organizations listed, pawn shops will buy some items. You may also leave items at the "reuse" area of transfer stations.

We are actively working with the Fairbanks North Star Borough and UAF to improve recycling options. Unfortunately, few people are actively reusing and recycling the items on this chart. Help us raise awareness -- and help us start new initiatives. Contact the Northern Alaska Environmental Center with your ideas (907)452-5021 info@northern.org
